

DURA FIX

TurboTorch Extreme - Proline – Air Fuel Welding Equipment

Durafix NZ is proud to distribute to Australian and New Zealand Industry, commercial and DIY specialists the Market Leader in Air/Fuel soldering and brazing handheld torch technology. USA designed self-lighting TurboTorch enables fast and efficient ignition with regulated flame control.

The exclusive Extreme swirl combustion technology uses Acetylene/Air, LPG/Air or MAPP Gas/Air mixtures to generate the hottest swirl combustion flame in the industry. Deal direct with the Australian distributor Durafix and save.

Product Description: 308160 Self Lighting Hand Torch

TurboTorch® dual fuel series, self-lighting Extreme® Hand Torches give HVAC/R and plumbing professionals a performance edge with either Propane (*blue*) or MAPP® (*yellow*) gas disposable bottles.

New Extreme Hand Torch tips reduce brazing time by up to 40 percent, increasing operator efficiency & dramatically reducing labour costs. Extreme tips increase weld time efficiency therefore minimizing Propane or Mapp gas fuel consumption.

Durable & efficient Extreme Torches are designed with a rugged stainless steel flame tube, built in filters & insulated ceramic wire holder that withstands high heat. All leading design technology Extreme hand torches come with a three-year replacement warranty.

- Built-in Piezo Lighter with Safety on/off Locking mechanism
- Designed for Disposable 20oz Propane or 16oz MAPP bottles
- Approx 2.5 hours burn time
- Adjustable flame control
- Auto on/off trigger action
- Stainless Tip Swivels 360° degrees
- Soft Solder: 3/4" – 3" with Propane or 1/4" – 4" with MAPP
- Brazing 1/4" – 1" with Propane or 1/4" – 1 1/4" with MAPP
- Bronze-Brace Automotive panel steel with MAPP
- 3 Year Limited Warranty

Product Description: 308158 Self Lighting LPG Torch Kit

TurboTorch® Extreme® LPG/Air kits mix atmospheric air with economical LPG. Thus eliminating expensive specialist gas & hire bottles. Use standard BBQ bottle.

TurboTorch® Pro-Line® series equipment performs faster & hotter than any other LPG tips used for plumbing and brazing applications.

The exclusive Extreme swirl combustion technology uses LPG/air mixtures to generate the hottest swirl combustion flame in the industry producing 30% more heat than competitor brands.

The TurboTorch® Pro-line® series of products give operators the added convenience of a self-lighting torch feature and interchangeable torch tips.

- Patented Swirl Flame design
- Detachable tip assembly for fast tip change
- All brass construction regulator
- Ergonomically designed handle means less strain on hand and wrist while working
- CPL-5T Soft Solders 25-60mm, Silver Solders 15-35mm with LPG
- Smaller CPL-4T and CPL-3T tips available on request (\$115.00 each)

 TurboTorch®

Market Leader in
AIR-FUEL BRAZING
and Soldering Products

Product Description: 308157 Self Lighting Acetylene Torch Kit

TurboTorch® Extreme® Self-lighting Acetylene/Air Kits significantly reduce operating costs by mixing acetylene with atmospheric air. Thus eliminating expensive oxygen gas & hire bottle. Kit includes regulator/gauge, 3.6m Hose, ergonomic handle with tap, self lighting detachable tip for ease of change to a smaller tip.

TurboTorch Extreme Tips get hotter & perform faster than any other tips used for plumbing and HVAC/R applications. The exclusive Extreme swirl combustion technology uses acetylene/air mixtures to generate the hottest swirl combustion flame in the industry.

- Gas Flow 9.7 CU FT/HR 4.6 LPM
- Soft Solder 40 – 75mm
- Silver Solder 20 – 40mm
- Bronze-Braze Auto Panel steel
- Patented swirl flame for max heat transfer – resists flame blow out and delivers hottest, most efficient flame – cuts brazing time by 40 %
- Smaller CPL-5a & CPL-8A self lighting tips available (reduces LPM gas flow and has more defined tip)
- Quick disconnect fitting for speed and ease of changing tips
